HEAD OFFICE AND NURSERIES AT HEILOO, HOLLAND

Heiloo, Holland, January 1960
our 90th year

Again we take great pleasure in sending to you, our many friends and customers, a copy of our new 1960 spring catalog, which lists and describes many of the newest varieties of bulbs, seeds, roots etc.

We would like to call your attention to the Bearded Iris and Hardy Plants, which we have included in this year's catalog and we wish to assure you that the quality of these roots and plants is of the same high standard, which we have established through the years since 1870.

At this time we like to take the opportunity to thank our many friends and customers for their valued patronage we have been favoured with. Since 1870, when our nurseries were founded at Heiloo, Holland, our prime aim has been to produce the finest bulbs and plants possible. Constant experimenting and testing have enabled us to produce finer bulbs from each successive planting. To-day De Jager bulbs are the standard of comparison the world over.

Please mail your order at your earliest convenience. Your order will be shipped from our Hamilton, Mass. warehouses where we carry a complete stock of flower bulbs, seeds, roots, plants etc. throughout the spring season.

We assure you of our best services at all times and are looking forward to the pleasure of serving you again.

DE JAGER'S GOLD MEDAL

Large flowering Gladiolus

Gladioli are now greatly favoured flowers and need no lengthy description. The improved strain of these magnificent flowers produce enormous spikes with very large strikingly coloured blooms of enchanting beauty. They have a very commanding appearance in borders and in groups among shrubs where they remain in bloom for a considerable length of time. They are also excellent as cut-flowers.

Culture: Plant Gladioli 3 to 4 inches deep and 5 to 6 inches apart in a well drained and good garden soil from the beginning of March, at intervals, until the middle of May, in order to have a succession of blooms from July until early autumn. Do not add fresh manure. Gladioli like a sunny and sheltered position. It is advisable to change the location of Gladioli-plantings every year.

The prices quoted are for Topsize corms.

Gladiolus elegans

For better flower-arrangement, table decoration and cutting, this new race of small-flowering Gladioli is extremely useful and may possibly develop to be the long expected answer for these purposes.

The graceful flowers are of delicate soft shades and most elegant in form. They are quite different from the characteristic Primulinus-hybrids and have more open florets, which are half the size of the grandiflora varieties with the dainty habit of the dwarf varieties from which they are hybridized.

Height about 2½ ft., early flowering and can be grown under the same conditions as all Gladiolus.

DAHLIAS

Dahlias are the royal representatives of the summer season and they are known all over the world as decorative garden plants. They have shown a remarkable increase in public favour in recent years because so many new and better varieties have been raised. Rich tints in every design of colour and strong stems make them invaluable for cutting as well as for garden purposes.

We are able to offer the following list of very choice and rare Dahlias, which should be of special interest to the real connoisseur and fanciers. The roots offered are all top size and can be planted from the 15th of April until the end of May. They are very easy to grow and do not need any special treatment although they want a sunny position in the garden and some bone-meal is recommended.

D. = Decorative; S.C. = Semi Cactus; C. = Cactus.

Royal Dutch Amaryllis

(Hippeastrum)

The Amaryllis produce huge Lily-like flowers and with their unique beauty and grace they give immense pleasure and satisfaction. The three or four funnel-shaped florets are placed on the top of a tall solid stalk and grow about eight to ten inches wide at mouth. This genus has several qualities combined and its shades are most exquisite and lovely.

The Amaryllis can be had quite easily in bloom when placed in a warm spot in the living room with normal indoor temperature. Remember the base of the bulb should be kept warm to stimulate the development of the roots.

Choice Seedlings Mixture, certain to give entire satisfaction because of their large blooms of breath taking beauty, the shades being mainly red. They deserve a much larger popularity and to encourage their cultivation, they are offered at a special price.

Large bulbs: \$ 2.00 each; \$ 5.00 per 3

Acidanthera Murielae

(Abyssinian Wildflower)

A richly scented flower that has all the characteristics of the Gladiolus family, though the silver white florets are of quite a different habit and show in the centre a large deep maroon purple blotch.

They grow to a height of 2 to 3 feet and are of an extremely graceful appearance. During the winter the corms of the Acidanthera Murielae require storage in a warm, dry place.

Plant after 15th of April 3 inches deep and 5 inches apart, they take a long time to develop and do not flower much before September.

Acidanthera Murielae 65 cts. per doz.; \$ 4.50 per 100

Superb Begonias

(Tuberous Rooted)

This Genus deserves attention because of its great value for planting in any position of the garden. From June and onwards, these so often lost spots will be brightened by the Tuberous Begonias with their huge flowers of magnificent bright and pastel colours.

Culture: The best method is to start them in a cold frame. Plant in rich soil. Good drainage is essential and water cautiously until plants have shown considerable growth, then increase supply. When a little hardened off and when nightfrosts are no longer expected they should be planted out in the garden. Begonias can be planted either single or in beds one foot apart.

Chincherinchee

Ornithogalum thyrsioides: a common hedgerow plant in the Cape of Good Hope. The native name chincherinchee is an onomatopoeia one, describing the sound which the breeze makes as it blows through the dried flower stems. It produces long fleshy leaves and a large umbel of pure white, brown-based flowers on a stout 12/18 in. stem in May-June. The best time for planting is April at a depth of at least 3 in. and 3 in. apart. They like a deep well-drained soil and a warm sunny spot in the garden. It is also splendid as a cold greenhouse flower and the blooms last remarkably when cut.

A most interesting bulbous plant from The Cape, producing 1 to 2 feet long spikes, thickly set with small flowers, excellent for pot-culture or in a sheltered spot in the garden. Flowering in August.

Bicolor, creamy-white, each petal with a lilac rim and purplish spotted stem. **75 cts.** each; **\$ 7.50** per doz.

Outdoor Freesias

Freesias are well known for their fascinating pastel colours, fragrance and unsurpassed beauty for indoor decoration. While it was formerly possible to grow them in a greenhouse only, through certain preparations they can now be planted in the garden with great success.

Plant towards the end of April about 2 inches deep and 2 inches apart in a well drained, good loamy soil and give them a sunny position. The outdoor Freesias flower from the end of July to late autumn and they have long lasting qualities.

Mixed Colours 80 cts. per doz.; \$ 5.50 per 100

Gloxinias

Gloxinias succeed under a very easy culture. In spring the tubers are planted in pots and placed on bottom heat during the first development of the foliage and flower. In the flowering period they are transferred into the greenhouse, conservatory or drawing room and afterwards should be removed and kept dry and frost-free during the winter.

Lilies

High Quality Dutch Grown Bulbs, Free from Virus

The Lily stands pre-eminent for its beauty, grace and performance and is not particularly difficult to grow, it may be left undisturbed for years while it increases in richness and display.

Culture: Lilies must not be allowed to dry out, but should be planted immediately on arrival at a depth of three times the height of the bulb in a well drained light loamy soil. No Lilies will thrive in full shade. The first season after planting Lilies may not flower profusely, but once established, they increase in richness and display. Cutting the dead stems in autumn is essential for good results the following year. Add a fresh top-dressing of old well decayed manure and rotted leaf-mould in early spring.

Willmottiae Improved, F.C.C., R.H.S., a very beautiful free flowering variety from China, under normal circumstances it grows to a height of 4 feet and bears about 20 lovely brilliant orange-red reflexed flowers on a stem, grows happily in partial shade, strongly recommended; flowering in July, stem rooting. **50 cts. each; \$ 5.00 per doz.**

High Quality American Grown Hardy Lily-hybrids

Afterglow, a Bellingham Hybrid. Tall variety and it has a beautiful pyramidal inflorescence and bears many large flowers of a rich crimson-red with a golden centre heavily spotted with maroon. It is a robust grower and propagates very freely so that it soon makes a large permanent clump in the garden. **\$ 2.00 each; \$ 5.00 per 3**

amabile, a very charming species from Korea. Brilliant, grenadine red flowers, nicely dotted with minute black spots, carried on strong, slender, three foot stems, that make a strong colour accent in the June garden. This variety does well in the full sun and will stand considerable drought. The brilliant colour does not fade in direct sunlight. Plant 5 inches deep in a light, porous soil, shallower in clay and adobe. **\$ 1.00 each; \$ 2.75 per 3**

auratum platyphyllum, a species from Japan, often called the Gold Band Lily. This variety prefers a habitat with long, moist and cool growing seasons and a deep, rich, well drained soil. If given other conditions, the plant naturally will be short-lived. These lovely Lilies with their great, fragrant, waxy-white flowers, attractively spotted and with a prominent golden ray down the centre of each petal flower in August–September. **\$ 1.75 each; \$ 5.00 per 3**

auratum platyphyllum Red Band Strain, a strain of magnificent broad leaved, vigorous garden plants made up out of the rare L. auratum platyphyllum seedlings that show a bright red band in the place of the usual golden stripe down the centre of each petal. **\$ 5.00 each; \$ 14.00 per 3**

auratum platyphyllum var. virginale, a vigorous and handsome, pure white form infrequently found among the seedlings of the true L. auratum platyphyllum. This is the most immaculate purest and most beautiful Lily that can be imagined. The very whiteness of the petals of this large flower seems to be intensified by the golden stripe down the centre ridge of each petal. A wonderful garden plant. **\$ 2.50 each; \$ 7.00 per 3**

Aurelian Hybrids, all types and colours. The main characteristics will be those of L. Henryi with broader petals, in new colours and often more trumpet-like habit. All Aurelians offered will be beautiful, vigorous and hardy Lilies. They will be of great value for mass planting, and for cutting. **\$ 2.00 each; \$ 5.00 per 3**

Bellingham Hybrids, a hybrid strain of Lilies, raised from native West Coast species. This strain of Lilies has more than lived up to hopes invested in the original crosses, since this group is most desirable for cut-flower purposes and informal or woodland planting. Ideally spaced on tall, slender, straight stems, the flowers are particularly long-lasting. The pyramidal flower-heads bearing up to 20 flowers, may be cut as the first buds open and will remain fresh until the entire spike is in bloom. The colour range is complete from clear yellow through the yellow-oranges to the bright orange-reds with scarlet-tipped petals. Most of the flowers are intensely spotted with brown or reddish-brown. Ideal for partial or light shade, they prefer a cool, light soil. **\$ 1.25 each; \$ 3.50 per 3**

Black Dragon Strain, a giant plant, all with good colouring, all with excellent placement of the flowers and all with flowers that resemble the original mother plant, the Black Dragon. The colour of this mother plant resembles that of the L. Brownii. For its colouring and vigor there is no finer strain on the market today. **\$ 3.00 each; \$ 8.00 per 3**

Citronella Strain, the remarkably beautiful golden and lemon-yellow strain of the Fiesta Hybrids. The plants reach a height of from 4 to 5 feet and carry as many as 30 large, recurved flowers. All of them of lovely pure yellow, spotted with small black dots. It is hardy anywhere and excellent for cutting as well as for arrangements.

85 cts. each; \$ 2.50 per 3

Croesus, one of the Mid-Century Hybrids. This is a tall, upright flowering Lily with large, goblet-shaped, golden-yellow flowers, nicely marked with near-black spots. Flower has great substance and lasts unusually long, both when cut and on the plant. The base of the flower is a deep golden colour but this in no way compares with the orange-yellows so common in the Umbellatum group. The plant is vigorous, hardy and free-flowering. Flowers early July and grows 3-4 ft. tall.

\$ 1.00 each; \$ 2.75 per 3

Destiny, one of the new Mid-Century Hybrids, a tall, cool purest lemon yellow that is most attractive. There are just enough brown spots on the petals to afford a beautiful contrast. As many as ten large flowers can be open at one time and carried well above the lustrous dark-green foliage on three to four feet tall stems.

\$ 1.25 each; \$ 3.50 per 3

Emerald Strain, essentially a great improvement over the Green Mountain Hybrids, this lovely strain has flowers of an almost translucent, pure, cool white, with a flush of emerald green when first opening. The very large trumpets are borne in a pyramidal inflorescence of perfect form and with stout stems that do not need staking.

\$ 1.75 each; \$ 5.00 per 3

Enchantment, the outstanding Mid-Century Hybrid. U.S. Plant Patent No. 862. F.C.C., R.H.S. 1955, F.C.C. Mass. H.S. This Lily is the most vigorous, prolific and healthy one that can be imagined. This variety is an upright Lily of excellent habit, with many well formed flowers of a vivid, Nasturtium-red colour.

85 cts. each; \$ 2.50 per 3

Fiesta Hybrids, mixed colours. The plants are tall and bear as many as twenty, nicely-spaced, reflexed and nodding flowers in colours that range from pale straw-yellow through vivid reds, blazings oranges to deepest maroon-reds. All of the flowers are lightly sprinkled with small maroon-black dots. A sun-loving Lily that should be planted from 5-6 inches deep in full sunlight. These Fiesta hybrids have proven themselves to be a wonderful addition to our summer garden plants during July.

85 cts. each; \$ 2.50 per 3

Golden Chalice Hybrids. The range of colours varies from clear lemon-yellow through the rich warm shades of gold and apricot-orange. Plant the bulbs in a warm, sunny location where they will get full sun, at least 6 inches deep. Extremely drought resistant, these hybrids are ideally suited for that warm, dry corner of the border, where they will flourish and flower freely with a minimum of care. June flowering, height 2½-4 ft.

85 cts. each; \$ 2.50 per 3

Golden Clarion Strain. These are dependable, sturdy, vigorous and prolific garden plants that will thrive wherever a Regal Lily can be grown. These Lilies flower in midsummer, they stand from 5-7 ft. tall when wellgrown and from mature bulbs. The colour range at present is from clear lemon-yellow, through straw and buttercup yellow to deepest gold. Some plants have entirely self coloured flowers, others show distinct brown or wine-red stripes on the reverse of the petals.

\$ 1.75 each; \$ 5.00 per 3

Green Mountain Hybrids. This is a late flowering trumpet Lily, all of them predominantly greenish-bronze in appearance. They will grow at their best when planted in light shade, where their unusual colouring comes out to best advantage.

\$ 2.50 each; \$ 7.00 per 3

Heart's Desire, an Aurelian Hybrid strain. These Lilies are essentially shallow, widely-flared and bowl shaped in shades of white, cream and yellow-orange. Many of them have a bright-orange throat, shading to cream-yellow at tips of petals. Highly recommended.

\$ 2.50 each; \$ 7.00 per 3

Jillian Wallace. This bold and lovely hybrid Lily is now the best of all new *L. auratum* hybrids. The fully opened flowers are more than eight inches across and the plants bear as many as seven huge flowers on 5 ft. stems. The petals are of a carmine red colour with white margins and spotted with a really intense deep crimson. Highly recommended.

\$ 5.00 each; \$ 14.00 per 3

Joan Evans, a Mid-Century Hybrid. A broad-petalled, bright, golden-yellow, upright Lily. It is late flowering and therefore a particularly fine addition to our garden Lilies. Carrying as many as from 6 to 9 flowers on a thin, wiry and tough stem, it stands from 4–5 ft. tall. Magnificent cut- and show-flower but equally good in the herbaceous border. Flowers attractively spotted maroon. **85 cts. each; \$ 2.50 per 3**

lankongense. Scented, pendant flowers of pale rose colour, deepening with age and spotted purple; strongly recurved. It seems to do excellent in porous, loam soil. **\$ 1.75 each; \$ 5.00 per 3**

martagon album. The pure white form of the long cultivated *Lilium Martagon*. The dainty wax-like flowers are gracefully placed and form a symmetrical pyramid on 4 ft. stems. One of the most permanent of all Lilies, once it is happily settled, it will increase from year to year, forming larger and finer spikes. It should be planted not deeper than 4 inches in a well drained, sunny location. **\$ 2.50 each; \$ 7.00 per 3**

Mid-Century Hybrids. A mixture of all colours and types. This group has been propagated as a mixture and we offer it at sharply reduced prices in order to acquaint as large as possible a group of gardeners with their beauty and usefulness. **85 cts. each; \$ 2.50 per 3**

Olympic Hybrids. The present Olympic strain which is characterized by its extreme vigour and size, form, colouring and good placement of flowers. The colour range of all the parent plants is present in the Olympic Hybrids in addition to new combinations and types which include trumpets, soft fuchsia-pink and the popular cool, icy-green. The exteriors of the petals are delicately shaded with light greenish-brown or soft wine tint and in some instances are a pure, glistening white. June flowering. They do equally well in full sun or partial shade. **85 cts. each; \$ 2.50 per 3**

Olympic Special Select. The general types available are the large, formal, waxy-white trumpets, characteristic of the trumpet family of unusual substance and vigour and exhibiting ideal placement, with either white or light pink exteriors. **\$ 2.50 each; \$ 7.00 per 3**

Pink Perfection Strain. Although in habit and in culture the plants are similar to the Olympic Hybrids, the flowers are shaded pink. This colour extends over the inner surface as well as the outer surface and is very beautiful. **\$ 2.50 each; \$ 7.00 per 3**

Prosperity, an entirely new colour in the Mid-Century Hybrid Lilies is being introduced with this lovely, cool, lemon-yellow, outward-facing flower. **\$ 1.25 each; \$ 3.50 per 3**

Royal Gold, a golden yellow, true-breeding mutation of the Regal Lily. This beautiful new variety is identical with the best *L. regale* except for its true golden colouring. The flowers have a most attractive, shiny, glistening surface, which adds to its beauty. **\$ 2.50 each; \$ 7.00 per 3**

speciosum Red Champion. A strain of the species *L. speciosum*, the red showy Lily of Japan. A grand Lily for garden decoration, cut flowers or potculture in a cool greenhouse. A situation in well drained soil where it can receive light shade during the hottest part of the day is the main requirement for successful culture. Plant the bulb 6 inches deep. Late August and early September flowering. **\$ 1.25 each; \$ 3.50 per 3**

Sunburst. An Aurelian strain made up from the plants which most closely resemble *L. Henryi* in shape and type of flowers. They are, however, much larger and less reflexed than those of *L. Henryi* and the colours include white, creamy-yellow and orange. The flowers are of unusual texture and substance and are suitable for either garden or cut-flower work. **\$ 1.75 each; \$ 5.00 per 3**

Sunstar. Crossed with various other Lilies, a new strain has come. Lilies so dazzling in their vermilion-red colour and so intense that in our opinion they must find their way in the world. The flowers are as large as those of *Enchantment* but carried in a flatter umbel. They retain both their shape and their colour in the hottest sun. From 3 to 4 ft. tall, on slender stems, the star shaped flowers will highlight the garden. **\$ 4.00 each**

Tangelo. This curious name, suggests the vivid orange colouring of this beautiful Lily. Tangelo is medium early, has slightly star shaped, outward-facing flowers. **85 cts. each; \$ 2.50 per 3**

Valencia. It is a midseason Lily of fine, rich, orange-yellow colouring. Very large, rather flat flowers having a slight mid-rib of deeper orange. **85 cts. each; \$ 2.50 per 3**

Lycoris

(Hardy Amaryllis)

Very similar to Amaryllis and Nerine, they are often regarded as greenhouse bulbs, but are certainly as hardy as Tigridias and do very well in the South in sandy soil and warm spots. Cover with ashes or litter during winter as protection; the bulbs establish themselves for blooming for years.

squamigera, sweet heads of lovely pink flowers on 2 feet stems, the most charming and rarest of the species. Flowers in August. **40 cts.** each; **\$ 1.00** per 3; **\$ 3.50** per doz.

Montbretia

Large flowering varieties only

These magnificent **New Montbretias** are a great improvement on the older varieties being taller and more robust, while the flowers are of much greater size and beauty, some of them measuring 3 inches across. These lovely flowers with their elegant and branched spikes are not only good cut-flowers, but they are also charming as garden varieties, their vivid, warm orange colourings give the most effective result during August/September when planted in groups from 6 to 12 in the border.

Culture: It is absolutely necessary to give them a sunny place and a well drained position. The best time for planting is during March and April at a depth of at least 3 inches and 2 inches apart. They like a deep well drained loamy soil enriched with leaf mould. Can be left undisturbed for years.

Lawn Seed Mixtures

The lawn is the background or foundation of the landscaped area and flower garden, and a setting for the home. We offer here lawn seed mixtures designed to produce the finest lawn turf under varying conditions and uses. Expertly formulated and blended with grasses of highest quality, they will produce luxurious turf both durable and lasting.

Always prepare a good seedbed on well fertilized soil at least 4 to 6 inches deep. Sow in early spring or fall (1 lb. to 200 sq. feet), cover seed with light raking, roll lightly and keep moist with light watering. Mow regularly after grass is 2 inches high. Fertilize each spring and fall using fertilizer designed for lawn feeding only.

GIFT TOKENS

Bulbs make a very suitable present where other articles fail. We supply Gift Tokens to any value desired and they are in the form of an attractive card to enable recipients to select Bulbs from our Catalogue to the specified value. On receipt of remittance at our Hamilton Office the Token can be sent direct to the recipient together with a copy of our current Catalogue, if so required.
